

SIXTH FORM REPORT

NAME J. Clark

LOWER SIXTH L6 Fr

DATE Jan. 77

SUBJECT Biology

John is working enthusiastically and has attained a good standard in the recent examination. He has an eye for detail, and this promises well for the future.

Signature of Master W. J. Fletcher

SUBJECT Physics

John has both the ability and attitude to do very well at A level. He is a most conscientious and thorough worker; the effort he has put into careful note taking and solving homework problems is reflected in the good test results that he has achieved.

Signature of Master M. R. French

SUBJECT Chemistry

A relatively disappointing examination for John. I am sure that his result reflected the fact that he tackled the examination paper as opposed to his technical ability. He produces good work in all subjects but there are occasional lapses in his concentration. With hard work he should obtain a good final.

SUBJECT.....

Signature of Master.....

John is clearly a promising scientist. He is also a sensible & useful member of the form except for his attitude towards punctuality. Sloth may not be the most lethal of the Seven Deadly Sins, but I should like to see more evidence of a social conscience in this respect.

Form Master

One would prefer one's doctor not to be slothful. He must remember that.

Headmaster

PARENT'S REPLY SHEET

I have read my son's report.

SIXTH FORM REPORT

NAME J. Clark

LOWER SIXTH.....

DATE July 77

SUBJECT Physics

John's good examination result comes as a pleasing culmination to a very sound year's work. His consistent approach has proved its value this year and he must ensure that he maintains it next year.

Signature of Master..... M. R. French

SUBJECT BIOLOGY

John's overall progress has been of a very good standard and his recent examination result reflected this. His enthusiasm is undoubted but occasionally he passes through a minor "bad patch" when the edge is blunted a little in his attack on the work. He must be on his guard against this.

Signature of Master..... W. F. Fletcher

SUBJECT CHEMISTRY

Despite a good examination result has been a decline in his attitude to work. Work seems to have become more of an effort, it is always well presented. I hope that temporary lapse that the summer holidays will

His examination results confirm the promise held out for him in his last report. One hopes that he will heed the two comments that hint of slight nonchalance, an attitude that, regrettably, he persisted in adopting towards punctuality. In all other respects, though, John was a thoroughly pleasant & agreeable member of the form.

Form Master

A good candidate - one, when we come to write a reference for his application to a medical school we shall want to be able to say, undoubtedly, that he comes up on time.

SIXTH FORM REPORT

NAME John Clark

UPPER SIXTH B

DATE November 1977

SUBJECT BIOLOGY

John is undoubtedly a candidate of good calibre, but I am concerned that there are times when he is ruled by his emotions and not his intellect. There are periods - and one has occurred recently - when his usual enthusiasm is lacking and his work suffers. This is his weakness, & one he must remedy before the summer.

Signature of Master W. J. Fletcher

SUBJECT PHYSICS

John continues to maintain a high standard in all aspects of his work. However he must not become complacent about his success so far as a good A level grade will require even more hard work. He must ensure that he always does his best.

Signature of Master M. R. French

CHEMISTRY

John must learn to apply himself more. He
outstanding work at the moment and this
must not continue in the crucial year
suggest he organises himself more in the
he is not without ability.

D. E. K.

SUBJECT.....

Signature of Master.....

John must not be satisfied by being merely
competent - he is worthy of more than that. I can
only repeat the concern I expressed in his subject
report. At his best, he can be very good indeed: at
less than his best, mediocre. It is as stark as that,
& John should be aware of it.
I regret that his time keeping is still somewhat lax
on occasion.

Signature of Master.....

Form Master

W. J. Fletcher

I think his work is
suffering from indecision about
the future. I very much hope
that he will decide to try for
a place at a university or Polytechnic
